In the Claims:

Claims 1 - 3 (Withdrawn)

4. (Original) An information processing method in an information processing system having an information terminal support server which supports an information terminal connected to a content server and loaded with a client program, the method comprising the steps of:

(a) receiving, at the information terminal support server, a message sent from the content server responding to a request from the information terminal;

(b) determining whether or not said message agrees with a predetermined condition;

(c) editing said message to insert a command for the client program when said message agrees with said predetermined condition; and

(d) sending said message in an edited form to the information terminal.

Claims 5 - 7 (Withdrawn)

8. (Original) An information terminal support server which supports an information terminal connected to a content server and loaded with a client program, the information terminal support server comprising:

(a) a message checker for determining whether or not a message sent from a content server in response to a request from the information terminal agrees with a predetermined condition; and

(b) a message editor, editing said message to insert a command instructing the client program when said message agrees with said predetermined condition.

Claims 9 - 12 (Withdrawn)

13. (Original) A computer program product recorded on computer readable medium for storing an information processing program executed within a system having an information terminal support server which supports an information terminal connected to a content server and loaded with a client program, the program product comprising:

(a) computer readable means for instructing the information terminal support server to receive a message sent from the content server in response to a request from the information terminal support server;

(b) computer readable means for instructing the information terminal support server to determine whether or not said message agrees with a predetermined condition;

(c) computer readable means for instructing the information terminal support server to edit said message to insert a command providing instructions to said client program when said message agrees with said predetermined condition; and

(d) computer readable means for instructing the information terminal support to send said message in an edited form to the information terminal support server.
